
Dear Pierre Bénech,

since 2006 we have been working on the simplification and modernisation of EuroCv Curriculum sharing tool with this free service. Our pdf export tool uses the Europass REST API to create the pdf file.

Our team has been working on updating the PDF exporting tool because **the current Europass API services (i.e. REST API, Remote upload, Remote upload and post-back and Statistics API) have been deleted.**

We have to create a **new way to generate the pdf** and the service will progressively be implemented throughout the upcoming months.

We are looking for professionals who want to share their knowledge for free in order to create a new EuroCv Service. Please, send your request of collaboration at staff@eurocv.eu

Thanks for your understanding and cooperation.

Michelangelo Turillo
